**Notes:**

- ✓ *The salary account will remain as such as long as the client continues to transfer the salary to his / her account in BKT, the interruption of the salary transfer for a period longer than 65 days results in the conversion of the account to "Standard" where the application of conditions according to this category begins;*
- ✓ *The categorization of the account from Standard or Student into the salary account is done after crediting the salary and is valid for the following months and not for the current month;*
- ✓ *Student Account will remain as such until the client reaches the age of 23, with the fulfilment of the condition the account passes to the Standard and the working conditions are applied according to the new category;*
- ✓ *The child savings account will remain as such until the client reaches the age of 18 + 1 day, upon fulfilment of the condition the account will be closed. If the client wants to have a savings account, a new adult savings account must be opened.*
- ✓ *The pensioners can have only one (1) pension account, as long as the pension is being credited to the account, the working conditions will be applied according to this category, the opening of the additional account is enabled only in the "standard" category and consequently the conditions according to this category will apply;*
- ✓ *The obligation for account maintenance is held by the bank when there is a positive balance in the account or a free Overdraft limit, retroactive for twelve (12) months.*

<b>Kosovo Government Bonds and Eurobonds</b>	
<b>Fee for competitive order</b>	10.00€
<b>Fee for execution of accepted competitive order</b>	10.00€

**Notes:**

\*Interest rates are shown in yearly basis (365 or 366 days). Interest calculation form:

- Term Deposit, Elastic Deposit:  $\text{Gross Interest} = \text{Deposit amount} \times \text{Interest rate} \times \text{days to maturity} / 365$  (or 366)
- Interest of time deposits is paid on maturity date, for Rrita deposit interest is paid every year whereas interest of Record deposit is paid every 6 months.
- Interest is paid on the maturity date, unless it is specified differently.
- The bank is obliged by law to keep 10 % of the interest amount as a withholding tax.
- The Bank does not offer interest rates for Current Account Deposits.

\*Elastic deposits are offered to clients with specific maturity, up to 3 years.

\*By introducing this bulletin, the interest rates of the previous bulletins do not apply.

## Notes:

\* The effective interest rate is calculated based on the maximum maturity for all types of loans.

\*\* Default interest is calculated on the obligation of the next installment or the unpaid (principal) amount for the credit product and the overdue period, and is 12.54% per year.

\*\*\* Loan restructuring fee, 0.50% over the restructured principal.

\*\*\*\* Loan prepayment provision is applied according to CBK regulation. Terms and conditions are specified in the loan agreement, as follows:

## Mortgage loans:

If the loan is closed in the first year, five percent (5%) of the principal amount. \*\* If the loan is closed in the second year, four percent (4%) of the principal amount. \*\* If the loan is closed in the third year, three percent (3%) of the principal amount. \*\* If the loan is closed in the fourth year, two percent (2%) of the principal amount. \*\* If the loan is closed in the fifth year, one percent (1%) of the principal amount. \*\* No penalty fee is charged after the fifth year.

## Consumer loans:

For remaining maturity > 12 months 1% of the remaining loan principal;

For remaining maturity < 12 months 0.5% of the remaining loan principal.

\*\*\*\* For loans with variable interest rate, the minimum interest is the same as the interest applied for the fixed period. The rate for the fixed period (-) 0.50% (+) 12-Month Euribor.

\*\*\*\*\* For clients who do not pass the salary through BKT, or withdraw the salary from BKT, the annual interest will increase according to the terms of the contract.

\*\*\*\*\* The late payment interest rate shall be calculated according to the requirement of the CBK Regulation on late interest which is the annual rate which consists of the reference rate increased by 8 percentage points fixed rate. The reference rate will be changed and published by the CBK every six months in website: <https://www.bqk-kos.org/>. The rate based on the average for the period July-December is published on February 1 and is valid for the next period from February 10 to August 9; whereas on August 1 of the calendar year the norm is published which takes as a basis the average for the period January-June and is valid for the next period from August 10 to February 9. In case the CBK has not published the new reference rate, the recently published CBK reference rate will be used.

The default interest will be calculated on the amount of the overdue principal over the number of calendar days in arrears depending on the number of calendar days of the year (365 or 366), applying the mathematical formula as follows:

$$KV = (B * Nv * D) / Nd$$

where:

KV - late interest for the accounting period;

B - Main debt (principal) in arrears;

Nv - Annual interest rate on arrears;

D - Number of calendar days of late interest during the accounting period;

Nd - Number of calendar days of the year (365 days - ordinary year, 366 days - leap year).

The accrued interest for each accounting period (usually monthly) is added to the accrued interest, so the accrued interest is the sum of all the accrued interest for all overdue payments up to the calculation date.

**Valid from 06.11.2024**
